PROJECT OBJECTIVES

Team	MKLP
Project Name	Estimate The Crop Yield Using Data Analytics

By the end of this project, we will:

- o Know fundamental concepts and can work on IBM Cognos Analytics.
- o Gain a broad understanding of plotting different graphs.
- o Able to create meaningful dashboards.

With the analysis that we do regarding estimation of crop yield, we will be able to:

- o Know the production every time with variation of factors like climate, rainfall , etc.,
- o Analyze and understand the patterns in the data (crop yield data)
